CONTENTS OF VOLUME XIII

No. 1.

M. BAUMWOLL SPINNER and G. KOKHOLM PETERSEN: Determining the pH of a phosphate buffer solution for blood measurements 1
E. LAUSING and C. RYDE: Serum proteins and protein-bound carbohydrates in tuberculosis and amyloidosis 8
Ø. ØVSTHUS and J. BØE: The assay of properdin. An evaluation of three methods 14
J. E ASVALL: Postmortem absorption of carbon monoxid in rats 23
C. GRÖNVALL: On the serum activity of lactic acid dehydrogenase and phosphohexose isomerase in pernicious and hemolytic anemias 29
E. S. OLESEN: Fibrinolytic activity produced in guinea-pig serum by some human body fluids and by hyaluronic acid 37
K. WINKLER: Urinary elimination of bromsulfalein in man 44
H. N. HAUGEN: The determination of thiamine and thiamine phosphates in blood and tissues by the thiochrome method 50
H. N. HAUGEN: Excretion of thiamine in diabetes: unrelated to glycosuria and polyuria 57
H. N. HAUGEN: Renal thiamine excretion in the dog; influence of parenteral administration of glucose 61
E. HAAHTI, T. NIKKARI, A.-M. SALMI and A.-L. LAAKSONEN: Fatty acids of vernix caseosa 70
L. HAMBRÆUS: Cystinuria in Sweden V. Influence of temperature on the separation of basic amino acids by high-voltage paper electrophoresis 74
B. J. GROSSMAN and T. ASTRUP: *In vitro* effects of heparin and chondroitin sulfuric acid B on the generation of thrombin 79
P. J. CHRISTENSEN: A note on the determination of phenylpyruvic acid in urine 84
K. AUKLAND and F. KIIL: Renal handling of potassium studied by ordinary and modified stop flow technique 87
P. LEYSSAC and J. LUND: Simultaneous direct and indirect inulin clearance as a separate kidney function test 100
N. E. BORGLIN and M. NYMAN: Effect of estrogens on the haptoglobin level in the blood 107
J. A. LARSEN, N. TYGSTRUP and K. WINKLER: The significance of the extrahepatic elimination of ethanol in determination of hepatic blood flow by means of ethanol (A comparison between the ethanol and bromsulfalein method) 116
K. JØRGENSEN and A. SVENDSEN: Amylose as the substrate in determinations of amylase 122
E. HIRSJÄRVI and F.-E. KRUSIUS: Effect of sedative doses of nembutal on the respiratory metabolism 126
O. M. FORSELL and I. P. PALVA: Determination of arginase in serum 131
V. ESMANN: The glycogen content of leucocytes from diabetic and non-diabetic subjects 134
O. EGEBERG: Assay of antihemophilic A, B and C factors by one-stage cephalin systems 140
H. C. GODAL: The assay of heparin in thrombin systems 153

T. K. I. LARMI and R. APPELQVIST: Measurement of the elasticity and compliance of the lungs. Description of a method and presentation of some clinical observations .. 167
T. K. I. LARMI and R. APPELQVIST: The influence of cardiac surgery on the mechanical properties of the lungs 174
J. GEORG and K. MELLEMGAARD: Sources of error in the determination of metabolic rate 180
I. STÄHLE: The helium dilution method in determination of ventilatory disturbances. Its application to bronchospirometry 186
O. SIGGAARD ANDERSEN: Sampling and storing of blood for determination of acid-base status 196
O. SIGGAARD ANDERSEN: Factors affecting the liquid-junction potential in electrometric blood pH measurement 205
O. HUSOM: The particulate nature of intrinsic prothrombinase 212
O. HUSOM: Intrinsic prothrombinase: Investigations on the possibility of its formation by successive coating of intermediates on activated surfaces 216
B. ZAAR and A. GRÖNWALL: A micro method for determination of barbiturates in serum as mercuric complexes 225
AA. LADEHOFF and J. RASMUSSEN: Fibrinolysis and thromboplastic activity in relation to hemorrhage in transvesical prostatectomy 231
H. BERLIN, R. BERLIN, G. BRANTE and S.-G. SJÖBERG: Studies on intrinsic factor and pernicious anemia. III. Intrinsic factor activity and B_{12}-binding power of electrophoretic fractions of intrinsic factor concentrates 245
M. ANDERSEN: The effect of different pathological conditions on the excretion of urea in the rabbit kidney 249
P. FYLLING: Serum lactic dehydrogenase activity in umbilical cord, at the end of labor in normal women, and the uncomplicated puerperium 264
F. KIIL and K. AUKLAND: Effect of high ureteral pressure on urine concentration during water diuresis 268
F. KIIL and K. AUKLAND: Renal concentration mechanism and hemodynamics at increased ureteral pressure during osmotic and saline diuresis 276
K. PIND and A. FAURBYE: The excretion of vanilmandelic acid in the urine of schizophrenics 288
C. E. G. LUNDGREN: Oxygen dissociation curve of human blood equilibrated with high concentrations of oxygen 291
E. RASMUSSEN and M. NIELSEN: The disappearance of oxygen from shed blood at body temperature 297
I. HOLM-JENSEN: Rapid determination of urea by a modified Conway technique 301
H. C. GODAL: The influence of heparin on the fibrin clot 306
H. C. GODAL: Heparin tolerance and the plasma proteins 314
A.-C. TEGER-NILSSON: Serum creatinine determination using an ion exchange resin 326
K. B. BJÖRNESJÖ: Simultaneous determination of cycloserine and pyrazinamide in blood serum 332
A. W. S. SØRENSEN: Phenacetin consumption in relation to 24-hour endogenous creatinine clearance 337

Reviews:

E. J. KING: History of the international federation of clinical chemistry 341
M. E. FREEMAN: Clinical enzyme unitage 346

Technique and Practical Problems:

I. HOLM-JENSEN: A simple mechanical stirring device. Its application to rapid determination of carbonates by a modified Conway technique 347
O. SIGGAARD ANDERSEN and K. JØRGENSEN: A gasometric apparatus for direct reading determination of carbon dioxide concentration in gas mixtures 349
K. JØRGENSEN: Rectangular cuvettes as self-emptying cells 351

Letters to the Editors:

J. BERGSTRÖM, J. FINDOR and E. HULTMAN: The contents of glycogen and potassium in human liver tissue obtained by needle biopsy 353
I. ØYE and J. FOG: The use of immersed test tubes as photometer cells 355

S. JARNUM and N. A. LASSEN: Albumin and transferrin metabolism in infectious and toxic diseases 357
E. GJONE: Inhibitory action of serum lecithin on the hemolytic activity of serum lysolecithin *in vitro* 369
L. KRAMER JAKOBSEN: Quantitative determination of urinary glucose using glucose oxidase and peroxidase 374
T. ASTRUP and P. OLLENDORFF: Estimation of thromboplastin activation in plasma 377
L.-G. ALLGÉN, K. E. FUNKE and B. NAUCKHOFF: Fluorometric determination of tryptamine in urine with the Zeiss ultraviolet spectrophotometer-fluorometer 390
K. EKBOM and B. WETTERDAL: Paper-electrophoretic studies on human semen with special interest in the distribution of administered Zn^{65} 396
K. KRISTOFFERSEN: An improved method for the estimation of small quantities of alkali-resistant hemoglobin in blood 402
E. S. OLESEN: A fibrinolytic system in human plasma activated by peptone or acid polysaccharides 410
Å. HOLMGÅRD: On the determination of carbonic anhydrase in biological material 416
A. CARLSTEN, B. HALLGREN, R. JAGENBURG, A. SVANBORG and L. WERKÖ: Myocardial metabolism of glucose, lactic acid, amino acids and fatty acids in healthy human individuals at rest and at different work loads 418
I. FALBE-HANSEN: Spectrophotometric studies on denatured globin hemichrome 429
P. BJÖRNTORP and K. CRAMÉR: Influence of cholesteryl esters from human serum on serum cholesterol determination with the modified Theorell method 434
S. BEVEGÅRD, B. JONSSON and I. KARLÖF: Percutaneous technique for transseptal left heart catheterization *via* the right femoral vein 439
AA. DRIVSHOLM and S. MADSEN: The influence of treatment with sodium salicylate on the serum glutamic oxalacetic transaminase activity 452
S. JARNUM: The ^{131}I-polyvinylpyrrolidone (^{131}I-PVP) test in gastrointestinal protein loss 447
S. JARNUM: Fecal ^{131}I-output after intravenous injection of ^{131}I-labelled human serum albumin in normo- and hypoproteinemic subjects 462
E. BERNE, L. HALLBERG and S. E. LINDELL: A method for recording rapid changes in radiation intensity applied to cardiovascular studies 476
H. E REFSUM: Hypokalemic alkalosis with paradoxical aciduria during artificial ventilation of patients with pulmonary insufficiency and high plasma bicarbonate concentration 481
H. CASTENFORS, H. ELIASCH and E. HULTMAN: Estimation of the splanchnic blood flow in man by the bromsulphalein (BSP) method; the effect of continuous variation of the peripheral plasma concentration of BSP 489
E. HULTMAN and H. CASTENFORS: Effect of injection of hypertonic glucose on splanchnic blood flow and oxygen consumption 503
H. CASTENFORS, H. ELIASCH and E. HULTMAN: Effects of ingestion of hyperosmotic glucose solution on the splanchnic circulation in normal subjects and in partially gastrectomized patients reacting with circulatory collapse 512

Technique and Practical Problems:

A. DE LA CHAPELLE: A simple technique for concentrating granulocytes for the determination of chromatin sex 525
J. LEHMANN: A solution for testing the cleaness of blood pipettes 529

Letters to the Editors:

H. C. GODAL: Simple syneresis procedure for fibrinogen assay 530
O. SVENSMARK: Phosphotungistic acid as precipitating agent in the determination of spinal fluid protein by the Lowry method 531
H. C. GODAL, R. HASSELBACK and P. F. HJORT: The recovery of thrombin from plasma 532

O. EGEBERG: Acquired circulating anticoagulant in classical hemophilia 535
L. LUND-ROLAND and J. MYREN: The effect of thyreoid function on bone marrow dehydrogenase activity 545
H. C. GODAL: Binding of heparin to fibrin(ogen) 550
M. SEIP, S. HALVORSEN, P. ANDERSEN and B. R. KAADA: Effects of hypothalamic stimulation on erythropoiesis in rabbits 553
S. HALVORSEN: Plasma erythropoitin levels following hypothalamic stimulation in the rabbit 564
C. G. BERGSTRAND, B. CZAR and P. H. TARUKOSKI: Serum haptoglobin in infancy 576
J. MYREN: The effect of anemia on bone marrow dehydrogenase activity as tested by the reduction of 2,3,5-triphenyltetrazolium chloride 583
B. ZAAR and A. GRÖNWALL: Determination of 2-amino-2-hydroxymethyl-1-3-propanediol (THAM) 588
K. KORSAN-BENGTSEN and J. YGGE: Purification of human thrombin on a carboxymethyl-cellulose column 591
K. KORSAN-BENGTSEN and J. YGGE: Mechanism of the clot-promoting effect of fatty acids and synthetic anionic detergents 594
K. KORSAN-BENGTSEN and J. YGGE: Purification of human and bovine accelerin (serum accelerator globulin) on an anion exchange resin column 604
O. HUSOM: A one stage method for the assay of platelet factor 3 609
O. HUSOM: The effect of human chylomicron suspensions on the recalcification time of platelet-poor plasma: An effect due to blood platelets 619
W. D. NOYES and C.-B. LAURELL: The *in vitro* stability of the haptoglobin-hemoglobin complex 625
J. LYNGSØE: Determination of the insulin-like activity in serum using rat epididymal adipose tissue 628
J. KERSTELL: A simplified method for the determination of xylose in urine 637
L. GARBY and J.-C. VUILLE: The amount of trapped plasma in a high-speed microcapillary hematocrit centrifuge 642
K. AUKLAND: Renal tubular permeability to urea 646
H. N. HAUGEN: The renal excretion of thiamine during administration of probenecid (p-(di-n-propylsulfamyl)-benzoic acid) 661
P. SEPPÄLÄ, T. NIKKARI and V. NÄNTÖ: Physical chemical properties of a urinary protein in a case of multiple myeloma 665
P. F. HJORT, O. EGEBERG and SOLVEIG MIKKELSEN: Turnover of prothrombin, factor VII and factor IX in a patient with hemophilia A 668
P. J. KNUDSEN and J. KOEFOED: Viscometric determination of hyaluronidase activity in biological fluids 673
S. BRODY and GUN CARLSTRÖM: Studies on the determination of human chorionic gonadotrophin by complement fixation 683

Technique and Practical Problems:

Y. KONTTINEN and E. H. KOSKINEN: Capillary indicator in the determination of clot lysis time 694
B. LAURENT: Device for scanning transparent electrophoresis strips 697
